Conti® VX Advance

Our New High Performance EPDM V-Belt.

Conti®VX Advance

Broader portfolio, extended length range and a new color: the CONTI®V FO PIONEER is becoming the Conti®VX Advance. The new transversely stiff, raw-edge EPDM heavy-duty V-belt for long-lasting power transmission.

The Conti®VX Advance replaces the established CONTI®V FO PIONEER – boasting all the same properties and the same performance, only it gets even better. We are now offering a wider range of lengths (up to 6.85 m) and improved local availability. The Conti®VX Advance can replace almost any drive equipped with wrapped V-belts. Typical applications include compressors, construction machinery, power cutters, exhaust fans and pumps in the oil industry. The new V-belt is particularly durable, temperature-resistant and antistatic.

Advantages at a glance:

- Same qualities and properties as FO PIONEER
- Extended portfolio and length range
- Better availability worldwide
- Transparent branding and naming structure
- Easy identification of belts, performance levels and properties
- New premium design for a premium belt

Properties

- Can be used in larger installations with greater center distances
- Improved durability thanks to abrasion-resistant compound
- Length range up to 6.85 m
- Temperature resistant from -40 °C to +130 °C
- Maintenance-free
- Matched length as standard thanks to Matchmaker system
- Antistatic according to ISO 1813
- Conditionally oil resistant
- Low PAH
